

JAN ŽITNÍK

Frontend Developer

SUMMARY

Frontend developer with more than 5 years of experience in ReactJS, Typescript, Javascript and more. Worked on various projects with both short and long term support. Focused on user experience, client satisfaction and sustainable code.

PROJECTS

Scout

Developer

📅 January 2020 - present

- Scout is a screening solution system which we modernize to a new and safe technology with minor logic changes. For the development of the app we use Gemini framework.
- Techs: ReactJS, Typescript, Javascript, JSS, Webpack, Jest

Gemini

Developer / Designer

📅 January 2018 - present

- Gemini is a ReactJS framework with focus to unify the UI development and to shorten the time of first app's draft delivery. It is a library of customizable components. I am creating these components and maintaining them.
- Techs: ReactJS, Typescript, Javascript, JSS, Webpack, Jest

Clooney

Analyst / Developer

📅 September 2016 - present

- Clooney is an implementation of product named Conclusion. It is an end-to-end IT process management solution developed by Eller company. What makes Conclusion unique, is a seamless automation of all process steps - from requirements collection to project planning, tracking and task management - in one single solution. My work is to adapt this robust system to customer's needs, creating new logic and views with Javascript and XML, new REST integration to communicate with other customer's systems and its configuration.
- Techs: jQuery, Javascript, HTML, CSS, PostgreSQL

GT Facility HelpDesk

Developer

📅 January 2016 - June 2016

- For an administration web app which serves to administrate the Helpdesk I created a database design and web user interface. The Helpdesk module is centrally linked to SCADA - automation systems for all Makro - Metro shopping centres in the Czech and Slovak republic. The GTFacility HelpDesk is dealing with incidents manually entered via the web interface and also with all incidents known as "alarms" generated through the SCADA automation systems.
- Techs: Delphi, MSSQL, AngularJS, CSS, HTML, Javascript

SKILLS

• Frontend

• Database

• Other

LANGUAGES

English ●●●●●

EDUCATION

Bachelor's in Software Engineering

Czech Technical University in Prague

Faculty of Information Technology

📅 2011 - 2014

Not completed

GT Facility, Solution, Epro

Developer

📅 May 2014 - January 2016

- Via internally developed framework Builder I was developing user interface and application logic. In this project we emphasized the optimisation of database queries and the creation of advanced database logic. System GT-Facility is a robust software tool for implementation of modern management facility as an individual solution integrated into REP system and related IT infrastructure.
- Techs: Object Paxcal, MSSQL, PL/SQL, SVN, XML, HTML
